# MULTI-ACCOUNT MANAGER

The Ultimate Solution for  
Money Managers

Targeting professional money managers seeking a robust platform to manage multiple accounts, OneRoyal's MAM service provides the perfect blend of flexibility, efficiency, and control. Utilize MT4 to handle multiple investor accounts with ease.

## MAM OVERVIEW

A MAM account is a master trading account enabling money managers to manage multiple sub-accounts with customizable trade sub-allocation. It's ideal for tailoring services to each investor's risk profile and account size. OneRoyal's MAM also supports fixed lot allocations.

## HOW MAM WORKS

Open a MAM account with OneRoyal and invite investors to join. Client funds are pooled in the master account, where trades are executed and then distributed proportionally among sub-accounts. Both profits and losses are allocated based on chosen allocation methods.

## ADVANTAGES OF ALLOCATION METHODS

Our MAM accounts offer flexible trade allocations and risk adjustments based on client profiles. Managers can define trade sizes and leverage, catering to varying risk appetites.

## KEY FEATURES

OneRoyal's MAM service allows for real-time deposits and withdrawals, diverse fee calculation methods, and up to 10 different trade allocations. Set performance fees to align with your trading strategy and investment philosophy.

## ADVANCED MAM TECHNOLOGY

Leverage all MT4 features for a personalized trading environment. Manage up to 200 live accounts, execute group orders, and monitor real-time equity and P&L. Enjoy dynamic leverage, automated commission calculation, and various order placement methods.

CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. 68% of retail investor accounts lose money when trading CFDs with OneRoyal's entities combined. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

Please note that this % is updated every 3 months, based on regulatory requirements.
